

UNIC

STELLA EPIC

stella ☆☆☆☆☆☆☆☆ *epic*

Between tradition and innovation, the Stella Epic proudly affirms UNIC identity and is the flagship of the brand. Its sophisticated silhouette holds the codes from the early beginnings of the STELLA story since the 1960s, and integrates a decidedly modern and performing technology.

MAKE IT EXPERT

Enhance your espresso with the Thermalink technology

The Stella Epic is a multi-boiler espresso machine with a very large steam boiler and individual coffee boilers. The thermal stability through boiler PIDs is precisely managed through pressure transducers and thermal sensors. The Thermalink technology intelligently controls the distribution of heat between the different heating elements, resulting in the Stella Epic's excellent thermal stability. By optimizing this use of power to heat the parts of the machine as needed, the system is in effect made more efficient of its energy requirements throughout its lifetime use.

Become a coffee expert

In expert mode, take control of your settings and your espresso extractions profiles! There are up to 5 recordable extraction profiles per group to set the key values for doses, temperature, pre-infusions and post-infusion. The control of the pressure curve is shown in real time on the group's control panel, while the adjustments and recordings of each profiling parameter are operated through the touch screen.

Maximize the precision of your coffee extraction

Working in tandem with the precision Lunar ACAIA compact scale, connected and integrated into the drip tray, control the brew ratio of each shot and the extraction time with the timer which starts as soon as the coffee makes contact with the cup.

MAKE IT YOURS

Be unique

Because its assertive design and sculpted form can be influenced by your personal touch, express yourself by giving the Stella Epic a unique look. Configure your Stella Epic by choosing the aesthetic details and technological add-ons which most inspire you.

Standard colors:
Californian Green,
Carmine Red,
Glossy Black,
Shiny White

Barista friendly

EASYLOCK

Minimize barista wrist fatigue and extend the life of group gaskets with the Easylock hydraulically sealed portafilter technology.

STEAMGLIDE

The horizontally positioned Steamglide lets you control the steam to micrometric levels.

COOL TOUCH

The Cool Touch let's you control the steam without the risk of burns and is easier to clean after each use.

HEIGHT-ADJUSTABLE DRIP TRAY

Easily adjust the work area by setting the best height of the drip tray: 5 positions varying 112mm (4.5") for different cup sizes.

UNIC

Unique in coffee.
Since 1919.

A unique coffee experience

UNIC's high-end offering is a testament to our deep-rooted passion, spanning over a century, our unwavering dedication to excellence, and an unending quest for innovation. Our espresso engineers pour their heart and soul into harnessing the latest advancements in technology and perfecting the art of extracting coffee. Unique in coffee, we have developed from crafting traditional espresso machines to pioneering work in super-automatic equipment, each combining precision, reliability and robustness. At the core of our existence lies a timeless mission – to fulfill our customers' and coffee connoisseurs' desires with unparalleled quality in every single cup. With an insatiable thirst for understanding our customers' future aspirations, we are driven to craft innovative solutions that transform their every pour into a spellbinding taste sensation.
